Education

Maulana Azad National Institute Of Technology **Expected 2026**
Master of Computer Applications *CGPA: 7.67*

194-N.S.C. Bose Govt P.G. College **2019 – 2022**
Bachelor's of Science in Computer Science *Percentage: 73.27%*

Technical Skills

- **Languages:** C, Java, JavaScript
- **Core Concepts:** Data Structures & Algorithms, OOP
- **Frameworks & Libraries:** Node.js, Express.js, React.js, Tailwind CSS
- **Databases:** MongoDB, MySQL
- **Tools & Platforms:** VsCode, Git, GitHub, Postman
- **Web Technologies:** HTML, CSS

Projects

E-commerce Shopping Web Application **Live Demo** **GitHub**

A full-featured online shopping platform built with the MERN stack, featuring secure authentication, Razorpay payment integration (test mode), Cloudinary for image storage, and an admin panel for product management.

- Developed a full-stack web application using the MERN stack (MongoDB, Express.js, React.js, Node.js) delivering a comprehensive E-commerce experience.
- Implemented secure user authentication with JWT and Firebase Google OAuth integration.
- Built core features including product collection display, product catalog, shopping cart, order placement and view, checkout workflow, and informational pages (About, Contact).
- Created an admin panel for managing products, allowing admins to add, update, and delete items with role-based access control.
- Utilized MongoDB Atlas for cloud-hosted database management with Mongoose for schema modeling.
- Integrated Cloudinary for efficient and scalable product image storage and delivery.
- Tested APIs thoroughly using Postman to ensure reliability and correctness.
- Leveraged npm modules such as Multer (file uploads), Razorpay (payments in test mode), dotenv, cors, and express-validator to enhance backend functionality and security.

E-learning Platform (Group Project) **Live Demo** **GitHub**

A collaborative full-stack e-learning platform built with React.js and MySQL, featuring course management, user authentication, and a responsive interface.

- Collaborated on designing and implementing the full-stack application using React.js for frontend and MySQL for database management.
- Developed RESTful backend APIs for course creation, enrollment, and user authentication with secure session handling.
- Contributed to database schema design, optimizing relationships for efficient data retrieval and storage.
- Implemented responsive UI components to enhance user engagement and accessibility across devices.
- Utilized Git and GitHub for version control and effective team collaboration during the project lifecycle.
